F-secure Anti-Virus 2009 - 1-3 users 12 months

\$65.90

An average of eight to ten new viruses are found each day and the rate seems to grow. A typical modern virus spreads across the globe in less than 24 hours causing damages to computer users. Home users are not an exception to this. If you are connected to the Internet, it is very important to protect your PC against computer viruses. With F-Secure Anti-Virus 2009, you can open e-mail attachments and use your PC without fear of virus infections or spyware intrusion. F-Secure has been designed to automate all key tasks required to keep your computer and data safe from viruses - it's so easy, all you have to do is install it on your PC.
